

TALK ANNOUNCEMENT

12 January 2016

10:30 a.m

Fermion

Speaker:

Zhuangde Jiang

*Director, Institute of Precision Engineering, Xi'an Jiaotong University
Vice Director-General of Chinese Society of Micro-Nano Technology*

Title:

Research of MEMS/Nanotechnology in XJTU-IPENG

Research Interest:

The research interests of Professor Jiang focus on micro-nanomanufacturing and precision measurement technology. He has developed high temperature pressure sensors and related series of MEMS devices, digital precision measurement technology and equipment. He has also carried out innovative researches on basic theory of micro/nanotechnology. Prof. Jiang has achieved one award of National Technological Innovation, one award of National Science and Technology Progress, and the other seven provincial awards. He published more than 300 academic papers, have 80 authorized invention patents and 15 software copyrights. He is an editor of *Microsystems & Nanoengineering*, the journal from the Nature Publishing Group. He was also selected as the chairman and session chair in the international and domestic important academic conferences for many times.
